

Year at a Glance 2017 – Accomplishments
North Georgia Animal Alliance

We are very pleased to provide you with a brief summary of our activities in 2017. In spite of challenges we encounter on a daily basis, we fully believe that we make a difference in the lives of animals, and the overall quality of our community.

Our mission is to reduce the number of adoptable animals euthanized at county shelters and promote the humane treatment of animals through responsible pet ownership. As we work to carry out this mission we were successful in accomplishing the following:

Activity	Dogs	Cats	Total
Animals Adopted Out	37	396	433
Animals Spayed/Neutered	102	381	483
CCC (altered, vaccinated and returned to caretakers)		244	244
Vet Care for Foster Animals			403
Vet Care for Owned Animals			129
Animal Intake	575	513	1,088
Animals transferred to rescues	486	24	510

We understand that there are far too many animals that never find homes, live in abusive or neglectful situations, or are euthanized because a permanent or foster home cannot be found for them. We are dedicated to constantly improving those numbers and here are some of the ways to accomplish this mission;

- Our dog program has become more of a “rescue” in that we are pulling more from the shelters and transferring to other rescues, providing basic vet care prior to transport.
- For our cat program, we have a network of foster homes, so we are able to partner with PetSense to adopt our cats on a daily basis. Our animals are fully vetted prior to adoption.
- Continue our Help Line where thousands of calls are logged each year with questions about everything imaginable including spay/neuter, financial assistance for medical care, pet surrender, abuse reporting, etc.
- Provide education on the importance of responsible pet ownership.

As we look toward 2018, we are filled with gratitude for our many caring volunteers, sponsors, donors and supporters. We hope **YOU** will get on board to help impact the lives of as many animals as possible. It will enrich your life!
